TECHNICAL SKILLS

Programming Languages

- C , C++
- Python
- JavaScript (ES6+)
- SQL

Web Technologies

- HTML5
- CSS3
- React.js

Databases & Cloud

- PostgreSQL
- Supabase , Vercel

Tools & APIs

- Git
- GitHub
- Claude Code

LANGUAGES

- English (Fluent)
- Hebrew (Native)

Project: agency-system

PROFILE

Third-year Computer Science student at HIT with a practical mechanical engineering background and a self-taught foundation in frontend development (React, JavaScript, HTML/CSS). Combines a logical, systems-driven approach with independent problem-solving. Recently designed and built an AI agent pipeline with a security-first database architecture.

PROJECTS

AI Agency System | Claude Code, PostgreSQL (Supabase), Vercel, Git

- Architected an automated web agency pipeline driven by 4 specialized AI agents (onboarding, site generation, deployment, billing), taking a client from intake interview to a deployed site with a payment link. Tested end to end on simulated clients.
- Designed a database architecture on Supabase (PostgreSQL) with a central business database and a separate, isolated database per client, with Row-Level Security enforced on every table by default.
- Built human approval gates before any database, billing or production action, and kept all keys and credentials out of source control.
- Automated site generation from reusable templates and deployment to Vercel, with Stripe payment links in test mode.

EDUCATION

B.Sc. in Computer Science 2024 - Present
Holon Institute of Technology (HIT).
GPA: 90

Practical Mechanical Engineering Diploma 2018 - 2019
Ort College, Rehovot.

MILITARY SERVICE

Combat Engineer, Southern Gaza Division | Mandatory & Career Service (3.5 years)

- Led and executed complex missions in challenging conditions.
- Worked in a team under pressure in dynamic environments.
